# **CIPROFLOXACIN INJECTION USP 200 MG/100 ML**

### **DESCRIPTION:**

Ciprofloxacin is an antibiotic that belongs to the family of medications known as quinolones. It is used to treat infections caused by certain bacteria. It is most commonly used to treat infections of the skin, sinuses, bone, lung, abdomen, kidney, prostate, and bladder.

It can also be used to treat some sexually transmitted infections (STIs), some forms of infectious diarrhea, and typhoid fever.

The extended release form of ciprofloxacin is used to treat bladder and kidney infections.

#### **COMPOSITION:**

Each 100 ml contains:

Ciprofloxacin USP... 200 mg

Water for Injection USP... q.s

## DOSAGE:

The dosage is determined by the indication, the severity and the site of the infection, the susceptibility to Ciprofloxacin of the causative organism (s), the renal function of the patient & in children & adolescents the body weight.

Sodium Chloride USP... 900 mg

The duration of treatment depends on the severity of the illness and on the clinical and bacteriological course.

# **SIDE EFFECT:**

Diarrhea, nausea, dizziness, lightheadedness, or trouble sleeping may occur.

#### **PRECAUTION:**

The use of ciprofloxacin in pre-pubertal children [except for use in inhalational anthrax (post-exposure)] and during pregnancy is not recommended. Increased toxicity of intravenous ciprofloxacin has been associated with increased duration of use, hence oral ciprofloxacin should be substituted as soon as practicable.

# **PRESENTATION:**

Ciprofloxacin Injection is available in 100 ml LDPE bottle.
