

HYDROCORTISONE SODIUM SUCCINATE FOR INJECTION BP 100 MG

DESCRIPTION:

Hydrocortisone belongs to a class of drugs known as corticosteroids. Hydrocortisone injection is used when a similar drug cannot be taken by mouth or when a very fast treatment is needed for patients with severe medical conditions. This medication is used to treat various conditions such as arthritis, severe allergies, blood diseases, breathing problems, certain cancers, eye diseases, intestinal disorders, and skin diseases.

COMPOSITION:

Each vial contains:

Hydrocortisone Sodium Succinate BP Equivalent to Hydrocortisone ... 100 mg

DOSAGE:

Hydrocortisone Sodium Succinate Injection BP may be administered by intravenous injection, by intravenous infusion, or by intramuscular injection, the preferred method for initial emergency use being intravenous injection. Following the initial emergency period, consideration should be given to employing a longer-acting injectable preparation or an oral preparation.

Dosage usually ranges from 100 mg to 500 mg depending on the severity of the condition, administered by intravenous injection over a period of one to ten minutes. This dose may be repeated at intervals of 2, 4 or 6 hours as indicated by the patient's response and clinical condition.

SIDE EFFECT:

Stomach upset, headache, dizziness, trouble sleeping, appetite changes, menstrual period changes, acne, or pain/redness/swelling at the injection site may occur.

PRECAUTION:

This product may contain inactive ingredients, which can cause allergic reactions or other problems.

Corticosteroids may increase susceptibility to infection, may mask some signs of infection, and new infections may appear during their use. Suppression of the inflammatory response and immune function increases the susceptibility to fungal, viral and bacterial infections and their severity.

PRESENTATION:

Hydrocortisone Sodium Succinate for Injection 100 mg is sterile powder available in 2 ml & 4 ml single vial.
